# HOW TO OPERATE

**Note:** Before first use, plug in and run the waffle maker *without* waffle batter for 5-10 minutes to burn any factory residue off the heating elements. There may be a little smoke or smell, but this is normal.

1. Plug the waffle maker into an outlet; the power light and the ready light will illuminate while the waffle maker preheats. Preheating can take 5 to 8 minutes.

**Tip:** Before making the first batch of waffles, brush a little vegetable oil on the waffle plates with a pastry brush.

2. When the ready light goes off, lift the handle and pour batter onto the first waffle plate to cover the grid.
3. Close the handle, lock, and rotate the unit 180°. Unlock and lift the second handle. Ladle batter onto the second waffle plate to cover the grid.
4. Close, lock, and rotate the unit 180°. Do not open for at least 3 minutes. (Opening too soon may cause the waffle to stick to the plates and split.)
5. Check your waffles after 3 minutes. If you want darker/crispier waffles, continue cooking until the desired color is achieved. Depending on your recipe, it may take 5-8 minutes for your waffles to be cooked just right.
6. Remove waffles using plastic or wooden utensils.
7. Flip the unit 180° and repeat.

**Note:** Close the waffle maker to retain heat until you are ready to make the next batch. Wait for the ready light to go out again before adding batter.

8. When finished cooking waffles, unplug the power cord from the outlet.

# CLEANING & CARE

1. Turn off and unplug the waffle maker.
2. Always allow the appliance to cool completely before cleaning.
3. Do not use abrasive brushes or pads, or harsh cleaning solutions.
4. Use a soft cloth, sponge or rubber spatula to remove any stuck-on food or residue.
5. The waffle plates and the drip tray should be washed in warm soapy water, or they may be cleaned in a dishwasher.
6. Wipe the exterior of the waffle maker with a damp cloth.
7. Do not immerse any electrical appliance, its cord, or its plug, into water.
8. Ensure all parts are dried thoroughly before reassembling and using this appliance.
